Getting Page Boundaries and Cropping

by Thom Parker, WindJack Solutions, Inc.

The Page Boundary is acquired with **Doc.getPageBox(cBox, nPage)** function
The Page Boundary is set with **Doc.setPageBoxes(cBox, nStart, nEnd, rBox)**

cBox is one of Art, **Trim**, **Bleed**, **Media**, **Crop**, or **BBox**
This Demo uses the **Crop** box, with is the part of the PDF visible on the screen.
